

LIMITED REVIEW REPORT ON THE QUARTERLY UNAUDITED STANDALONE FINANCIAL RESULTS OF THE COMPANY PURSUANT TO THE REGULATION 33 OF THE SEBI (LISTING OBLIGATIONS AND DISCLOSURE REQUIREMENTS) REGULATIONS, 2015

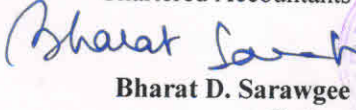

Review Report to
The Board of Directors,
INDO-ECO (INDIA) LIMITED

We have reviewed the accompanying statement of unaudited financial results of **Indo-Eco (India) Limited** for the quarter and half year ended 30th September, 2020 attached herewith, being submitted by the Company pursuant to the requirements of Regulations 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ('the SEBI Regulations'), as amended.

1. This Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors in their meeting held on 10th November, 2020, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.
2. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and an analytical procedure applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
3. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying statement prepared in accordance with applicable Accounting Standards as notified under the Companies (Indian Accounting Standards) Rules, 2015 as specified in Section 133 of the Companies Act, 2013, read with the relevant rules issued there under and other recognized accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, as modified by Circular No. CIR/CFD/FAC/62/2016 dated July 05, 2016, including the manner in which it is to be disclosed, or that it contains any material misstatement.

Indian researchers working towards developing effective vaccine strategies against SARS-CoV-2 and HIV

BENGALURU, NOV 10 / -- / Indian Institute of Science claimed today that researchers led by Raghavan Varadarajan, Professor at IISc's Molecular Biophysics Unit, are working towards developing effective vaccine strategies against two viruses: SARS-CoV-2 and HIV. In two studies published in the past week, they reported the design of a 'heat-tolerant' COVID-19 vaccine candidate and a rapid method to identify specific regions on the HIV envelope protein that are targeted by antibodies, which can help design effective vaccines, an IISc press release said. The studies were published in the Journal of Biological Chemistry and the Proceedings of the National Academy of Sciences respectively, according to Bengaluru-based IISc. The COVID-19 vaccine candidate contains a part of the spike protein of the novel coronavirus called the Receptor Binding Domain (RBD) - the region that helps the virus stick to the hosts cell. It is being developed by Varadarajans lab in collaboration with Mynvax, a startup co-founded by him and incubated at IISc, as well as several other institutes. "When tested in guinea pig models, the vaccine candidate triggered a strong immune response", the statement said. "Surprisingly, it also remained stable for a month at 37C, and freeze-dried versions could tolerate temperatures as high as 100C. Such 'warm' vaccines can be stored and transported without expensive cooling equipment to remote areas for mass vaccination - most vaccines need to be stored between 2-8C or even cooler temperatures to avoid losing their potency", it said. Compared to newer types such as mRNA vaccines, making a protein-based vaccine like this can also be scaled up easily in India where manufacturers have been making similar vaccines for decades, IISc said. There is another difference between the vaccine candidate being developed by Varadarajans team and many other COVID-19 vaccines in the works: it only uses a specific part of the RBD, a string of 200 amino acids, instead of the entire spike protein. The team inserted genes coding for this part via a carrier DNA molecule called a plasmid, into mammalian cells, which then churned out copies of the RBD section. They found that the RBD formulation was just as good as the full spike protein in triggering an immune response in guinea pigs, but much more stable at high temperatures for extended periods - the full spike protein quickly lost its activity at temperatures above 50C, according to the statement.
